PROJECTS

Finding-missing-person-using-AI-master

Python, OpenCV, Face Recognition, SQLite

- Built an AI system to detect missing persons using facial recognition.
- Processed and matched images with stored data for identification.
- Stored records in a database for easy search and retrieval.

Personal Developer Portfolio

React.js, Tailwind CSS, Framer Motion, Vite

- Built **fully responsive portfolio** with scroll animations, custom cursor, and 3D project showcases.
- Deployed on **Vercel** with 95+ Lighthouse score — serves as live proof-of-skill for recruiters.

AI Chatbot UI for Small Businesses

React.js, OpenAI API, Node.js, Tailwind CSS

- Plug-and-play **embeddable chatbot widget** with GPT integration; custom system prompts per business.
- Implemented **token management** reducing API cost by ~40% through conversation history trimming.

ACHIEVEMENTS

- **LeetCode**: Actively solving DSA, targeting 500+ problems.
- **CodeChef**: Participating in rated contests; building ranking and problem-solving speed.
